# VAISHNO STORAGE SOLUTION

## About Us

Vaishno Storage Solution has a vision to provide matchless solution for warehousing and storage needs for a variety off industries and oraganisations. We put our best step forward in manufacturing, supplying and installing an all inclusive range of Industrial Rack made in metals and steel slotted angles & display racks, mezzanine floors, mobile racking system, porta cabins, prefab building systems and much more.

Located in the boisterous city of Bhairahawa, we have achieved an in-depth knowledge during a decade of broad experience in this industry witch leads us to new levels of accomplishment. We are growing remarkably in the domestic markets.

We provide outstanding level of satisfaction to our clients by working in tandem with our highly specialized and skilled team of professionals. A perfect amalgam of professionals and highly active R & D wing facilitates us to establish ourselves in this competitive scenario. With the assistance of strategic tie-ups with various reputed C&F agents, we never fail to meet the testing demands of our clients with enthusiasm and within stipulated time. A flawless and innovative range of products with customization is made available together with a competitive pricing policy.

## Mezzanine Floors

Mezzanine Systems are the solution to expanding useable floor space without expensive leases, costly land acquisition or construction delays. Spangle mezzanines and industrial warehouse platforms provide full utilization of both floor-level and platform-level space with no cross bracing between support columns. Spangle elevated work platform systems provide flexibility, allowing you to change or expand designs to meet evolving needs.

A Mezzanine floor is essentially a raised platform that is supported by steel columns and is totally independent of the host building. It allows you to create additional floor space from wasted air space above existing work and storage areas and can be used to created extra office, storage, production and retails space. Any other extra level of storage can be added to the existing framework of the floor.

Mezzanine floors are easy to install, have simple nut and bolt assembly, and can also be easily expanded, modified or moved, as per the requirements of our clients.

◀ Mezzanine Floor

## Mezzanine Floor Two-Tier Racking

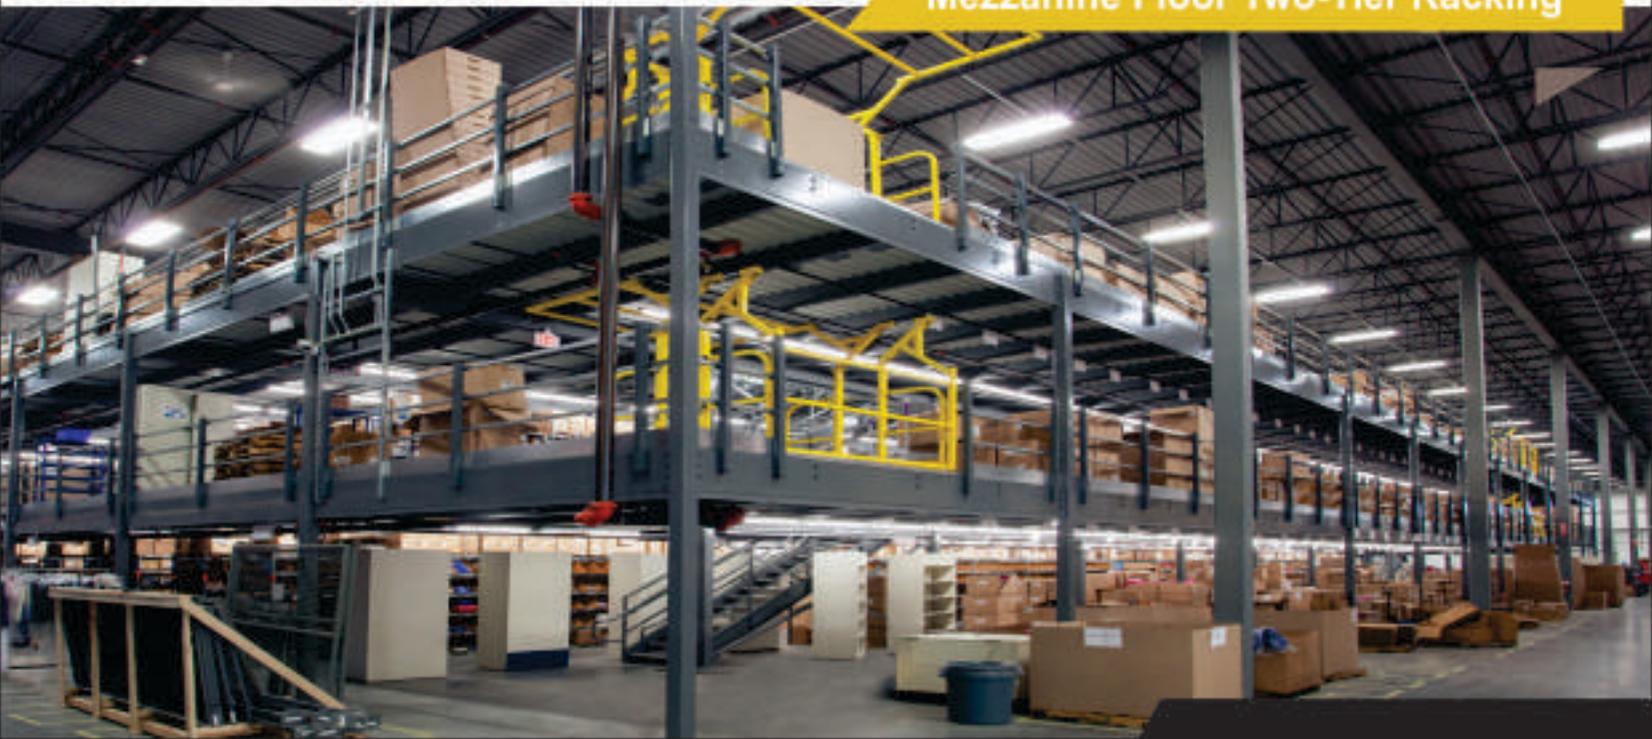

It is the quick, easy, cost effective way of installing a mezzanine floor and gaining the advantage of additional room for extra storage, office accommodation or any other purpose.

This is specifically designed to meet standards comprises columns, main beams and clip-on secondary beams. Such is its proven strength.

## Mezzanine Floor Two-Tier Racking

# Pallet Racks

## Pallet Racking :

Pallet racking is a single or multi-level storage system that is utilized to support high stacking of single items or palletized loads. Pallet rack systems are a fundamental component of any distribution, storage, or material handling operation. Pallet racks allow rapid access to stored materials.

## Drive-In Racking :

Drive-in racking is designed for the storage of homogenous products. It accommodates a large number of pallets for each SKU.

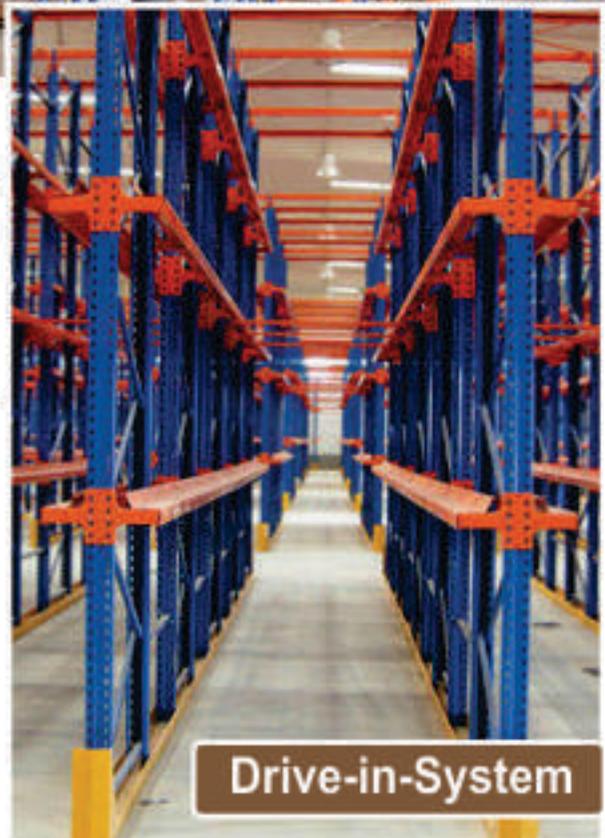

Advantage :

Removal of aisles between the ranking.

Rigorous control of entries and exits.

It allows as many SKU as loading lanes.

Maximum profitability of the available space (up to 85%).

Drive-in-System

## Radio Shuttle

## Radio Shuttle Racking :

Radio Shuttle Pallets Racks are a semi-automated solution for the storage of high-volume palletized goods and mass storage products. They are often used in warehouses and distribution hubs for food, beverages, or warehouses with special storage conditions.
